Founded in 1951 by Otto Rösel, the company is highly consolidated in the market and is currently run by the 3<sup>rd</sup> generation of the family. With an

Area of approximately 150,000 m<sup>2</sup> And a team with a long history of dedication, the company has a strong social commitment, working

Directly in São Carlos, its headquarters city, with actions aimed at the well-being of the local community. The company stands out for its total

Control of production, being 100% verticalized, which allows it to offer exclusive products, always with quality and innovation, adapted to the needs of small, medium and large shopkeepers.

The manufacture of yarns, which are transformed into carpets and carpets, is carried out with the use of cutting-edge technologies, covering processes such as extrusion, dyeing and weaving. With techniques such as tufting and jacquard, the company ensures high quality and durability of its products. In addition, it integrates sustainable solutions by transforming reusable materials into new products, such as coatings for the automotive industry, reaffirming its commitment to efficiency and environmental responsibility.

Pioneer in Latin America, it was the first in the region to win the Green Label Plus seal and holds important international certifications, such as ISO 9001, ISO TS16949 and ISO 14001. The company is also present at the largest design events, especially the Salone Internazionale del Mobile di Milano, the most prestigious event in the industry.

History of Tapetes São Carlos mixes with the evolution of weaving in Brazil, after all, there are more than 70 years of history. Family business, in which I represent the third generation, in fact, a large family composed of more than 500 employees, many of whom were born and raised within this factory field. Relationships of friendship and trust combined with a lot of professionalism.

It is a great satisfaction, flanked by a great responsibility, to lead a company with so much tradition and values. However, the culture of Tapetes São Carlos excels in the value of innovation and paradigm-breaking.

Today, innovation processes focused on sustainability have transformed us into a zero waste company, fully verticalized, because we manufacture from the thread of our carpets and, finally, we are suppliers of the demanding automotive chain with the manufacture of internal coatings for cars.

This excellence in production led us to exhibit in the world's largest design event. A great honor to bring a 100% Brazilian

*Clemens Boecker*
